Certification Exams

The Exam Instructions below explain how to operate the controls on the exam you are about to take so you should read them carefully.

Before the exam starts you will be given the option to take a **Sample Test** which is comprised of three simple questions. We strongly recommend you take the sample test as it will give you a chance to see how the exams work before you begin the real thing. After the sample test is completed you will have the option to proceed with the real exam or exit.

Exam Instructions

The 'ACCEPT' button

Clicking on the '**ACCEPT**' button will confirm your answer to the question. The '**ACCEPT**' button will remain disabled until you begin performing an action. You may change your answer before completing each task.

Clicking the '**ACCEPT**' button indicates you have completed the question to the best of your ability.

The 'NEXT' button

Clicking the '**NEXT**' button before you begin your answer will result in the question being **skipped**. Skipped

Please read these instructions carefully. Press Start to proceed.

Heading 1 Arial 16 B I U

The RDC Team

RDC is a development organization that relies upon the teamwork of its people, technology, and roots, and is constantly strengthening them through industrial affiliations, working partnerships within the university, education, and experience. Primary goals are evolving robot task capability by developing advanced robots and driving their performance beyond precedent state-of-art. Although RDC's charter centers on research that enables field robot development, the vision is for capable, productive field robots to work in the world.

A Different Direction in Robotics

MFI Project Description

We propose to develop a micro mechanical flying insect (MFI), a 5-10 mm device eventually capable of sustained autonomous flight.

Towards this end the project is divided into four stages

Page 1 Sec 1 1/2 At 1.1" Ln 1 Col 1 REC TRK EXT OVR English (U.K)

Task 1 of 3

09:53

What key would you press to begin a new paragraph at the insertion point?
